

We at Family Dental Health Center care deeply about our patients' and employees' health and safety

FDHC will adhere to standard preventive measures to control the transmission of diseases, as set forth by The American Dental Association and the Centers for Disease Control and Prevention, including:

- Every person who enters our office will be screened for **elevated body temperature**, using a **forehead thermometer**. Anyone with elevated temperature will be rescheduled.
- **Patients will be screened** for possible disease symptoms or exposure, prior to treatment.
- Patients who have a **cough** will immediately be given a mask to wear and will be rescheduled.
- Friends and family of patients need to **practice social distancing**, by either staying home or waiting in vehicles.
- **Only one parent** (or caregiver) will be allowed to accompany a child in the operatories where treatment is provided.
- **No friends** will be allowed to accompany patients during treatment.
- **Extra diligence** will be practiced **to clean and disinfect the office** continuously throughout the day, including disinfecting chairs, bathrooms, doorknobs, counters, etc.
- **Hand-sanitizers** are available at the reception desk.
- Toys, magazines, and other shared objects have been **removed** from the office.
- **Employees** who have ANY disease symptoms will remain at home.
